PROFESSIONAL SUMMARY

Final-year Computer Science student with hands-on experience building full-stack web applications using the MERN stack. Skilled in React.js, Node.js, Express.js and MongoDB, with a working knowledge of Java, SQL. Passionate about solving real-world problems through clean, scalable code, with growing interest in Machine Learning. Seeking a full-time software engineering role to contribute to and grow within a product-driven team.

SKILLS

- **Languages:** JavaScript, Java, SQL
- **Core Subjects:** Data Structures & Algorithm (DSA), Object-Oriented Programming (OOP), DBMS
- **Frontend:** React.js, Redux, HTML5, CSS3, Bootstrap, Tailwind CSS
- **Backend & Database:** Node.js, Express.js, MongoDB, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code

ACHIEVEMENTS & CERTIFICATIONS

- Finalist, HackGenx – National Level Hackathon (2026)
- AWS Academy Graduate – Cloud Foundations
- GitHub Developer Program Member; 400+ public contributions on GitHub
- Build and experimented with Machine Learning models for real-world problem solving

EDUCATION

- **B.E. Computer Science & Engineering** | Sipna College of Engineering and Technology, Amravati
CGPA: 7.66 | 2024 – 2027 (Final Year)
- **Diploma in Computer Science & Engineering** | Government Polytechnic, Khamgoan
Percentage: 82.86% | 2021 – 2024

EXPERIENCE

Frontend Developer Intern | Microspectra Software Technologies Pvt.Ltd May 2023 – Jun 2023

- Developed frontend modules for an e-commerce web application
- Integrated backend authentication using JavaScript.

PROJECTS

LiveDesk – Real-Time Collaboration App (MERN + Socket.IO) — Ongoing

- Building a real-time collaboration application using the MERN stack, implementing Socket.io for live, bidirectional communication between users via video conferencing

VistaStay – Full-Stack Rental Listing Platform (MERN Stack) Github: github.com/bodhekarvarad/VistaStay

Developed an Airbnb-style property listing platform using Node.js, Express.js, MongoDB and EJS, enabling users to create, edit, and review listings.

- Implemented secure authentication and authorization with Passport.js, restricting edit/delete access to listing owners only.
- Integrated Cloudinary for image uploads and Mapbox for interactive map-based location display, with backend geocoding of property addresses.

Brokzyn – Full-Stack Trading Dashboard (MERN Stack) Github: github.com/bodhekarvarad/Brokzyn

- Built a full-stack trading dashboard with React.js, Node.js, Express.js and MongoDB, and watchlist management.
- Designed a responsive, reusable component library with Material UI and Chart.js, translating a trading-platform UI/UX into clean, maintainable front-end code.
